RICK BREITENBACH
CAL FED BAY DELTA PROGRAM
1416 NINTH ST, SUITE 1155

Dear Rick Breitenbach,

Hi my name is Cameron Soo. Alive in Orinda Ca. I'm taking a Marine Biology class at the Academy in Berkley. We did lots of studying on the estuary or also known as the "Sacramento Bay Delta" .I think the best part of the Delta is is that it is a buffet for lots of animals.

We read 4 new letter on the bay delta and learned a lot.

I also think of building Aquifers is a bad idea because over the years people might forget about them and they might brake. That would flood us out.

I think we should find more water resources, There might be water on the moon we could use.

We all should use less water so the fish can live and spawn in the delta.

Sincerely,

Cameron Soo
